OUR STORY

Kevin T. Carter is the Founder & Chief Investment Officer of EMQQ Global. While he principally considers himself an active “value” investor, he has collaborated with Princeton economist and indexing legend, Dr. Burton G. Malkiel, for more than 20 years. Their work together began in 1999 when Carter founded eInvesting, a pioneer firm in fractional share brokerage acquired by ETRADE in 2000. In 2002 they co-founded Active Index Advisors, a pioneer in “direct indexing” acquired by Natixis Asset Management in 2005. In 2006, their efforts turned to China and Emerging Markets as they launched several China focused ETFs on the NYSE with Guggenheim Partners. Mr. Carter founded EMQQ Global in 2014 and launched The Emerging Markets Internet & Ecommerce ETF on the NYSE on November 12, 2014.

Founder + Chief Investment Officer

Dr. Burton G. Malkiel
Advisor

"I have had the sincere pleasure of partnering with Princeton economist and investing legend, Burt Malkiel for over two decades. From the beginning, our shared mission has been "fixing" structural problems in the investment world. We introduced fractional share brokerage in 1999 and direct indexing in 2002. In 2006, it was Burt's interest in China that ended up pulling me deep into exploring investment opportunities in Emerging Markets. EMQQ Global represents the culmination of that work, and our efforts to "fix" the problems with traditional Emerging Markets ETFs."

WHY YOU SHOULD CARE

THE OPPORTUNITY: BILLIONS OF NEW CONSUMERS WITH SMARTPHONES

- 1 Emerging and Frontier Markets are home to 85% of the world's population and nearly 90% of the world's population under the age of 30.
- 2 With a combined population of **6.6 Billion** people and economic growth rates that average **2x the growth** of the developed world, they have long represented an enormous investment opportunity.
- 3 In fact, McKinsey & Co. has long hailed the rise of the Emerging Markets consumer as: **"...the biggest growth opportunity in the history of capitalism."**

THE PROBLEM:

TRADITIONAL EMERGING MARKETS ETFs HAVE FAILED INVESTORS

However, despite this enormous growth opportunity Emerging Markets investors have made little or no returns over the past 15 years. The MSCI Emerging Markets index has yielded a price return of -23.2%.

WHY? The Index Sucks.

1

Traditional Emerging Market indexes give investors the “wrong story”: State-Owned Enterprises, the legacy economy and corruption. Consider that the earnings growth of the MSCI Emerging Markets Index for the past 15 years was only 13%.

2

To make matters worse, traditional indexes fail to include many of the fast growing and entrepreneurial internet leaders in emerging markets.

THE SOLUTION:

EMQQ GLOBAL SEEKS TO CAPTURE THE REAL GROWTH IN EMERGING MARKETS

There are 3 simultaneous megatrends driving enormous growth for internet & ecommerce companies in Emerging Markets and enormous value creation for investors.

- 1 Billions of New Consumers - Emerging Markets have always been about the rise of billions of new consumers – what McKinsey calls "the biggest growth opportunity in the history of capitalism."
- 2 Getting their first ever computer – an affordable smartphone that is getting better and cheaper every year.
- 3 Accessing the internet for the first time.

THE LEAPFROG EFFECT:

INFRASTRUCTURE

These new smartphone-enabled consumers do not have bank accounts, debit or credit cards, cable televisions or automobiles and are **leapfrogging traditional consumption**.
